

19-inch 2025 Micro-module Data Center for Island Use

Overview

The Intellinet Network Solutions Micro Data Center is a modular network and server cabinet that provides rapid, cost-effective and energy-efficient service. Highly integrated and flexible installed data center infrastructure for rapid deployment and efficient operation and maintenance. Inspur intelligent micro module product adopts factory prefabrication production and on-site modular installation technology for rapid deployment and flexible expansion. Delta InfraSuite is a new generation, highly integrated modular datacenter solution. It uses racks as the datacenter carrier and fully integrates all sub-systems including UPSs, cooling, power distribution, lightning protection, fire control (optional), wiring, airflow management, intelligent. Standard 19-inch Design: Fits standard server racks for efficient data center layout. High-Quality SPCC Cold Rolled Steel: Durable and resistant to corrosion for long-term use. INVT iSmart can be used in offices, the noise level is around 55dB after the door is closed, equivalent to a quiet office, does not affect work at all. Chat with supplier now for more details.
