

48-port switch with optical ports

Overview

5G Base-T ports, 4x10G SFP+ interfaces, and 2x40G QSFP uplinks, this optical fiber switch combines high-density connectivity with industry-leading energy efficiency. The 40G QSFP switch architecture supports flexible network scaling while maintaining ultra-low power. Featuring 48x2. It enables unified network management and stable data transmission across the entire campus. They're not typically used as core. Choosing the right 48-port network switch is crucial for building a robust and efficient network, whether it's for a growing business, a data center, or a large office setup. This switch offers state-of-the-art analytics and telemetry capability built into its next-generation Application-Specific Integrated Circuit. The VSU connects to peripherals through an aggregate link, realizing service switching in milliseconds upon a failure.
