

AC AC distribution box

Overview

An AC distribution box distributes alternating current to branch circuits in buildings, equipment, and low-voltage installations. It usually contains AC-rated MCBs, MCCBs, RCCBs, RCBOs, neutral bars, earth bars, busbars, and AC surge protective devices. The Air Conditioning Distribution Box is a critical electrical component that centralizes power distribution for cooling systems while providing protection and ease of maintenance. A provision can also be made in ACDB to monitor the consumption of power from SPV Power Plant. 714 RV Wall Thermostat with Control Board Kit,Compatible with Dometic Air Condtioner Series B57915□B59516□640310□640312□640315□459530□B59530.
