

British Optical Amplifier QSFP

Overview

This QSFP-DD dual pluggable EDFA booster amplifier offers a optical input range and provides a +20dB nominal gain to a C-Band DWDM link. The world first pluggable QSFP-SOA, QSA is a full-functioning SOA module with control circuitry packaged inside. The product has compact size, excellent optical parameter and built-in control circuit, which can be directly. The QSFP-DD OLS is a pluggable open line system solution that can be directly hosted on a Cisco router. Due to the small size and easy installation, the QOA is designed for. QSFPTEK offers fiber optic amplifiers including optical booster edfa, optical pre-amplifier edfa FMT series, great choice for building long-haul dwdm connection reach to 160km max. It is configured for Automatic Gain Control (AGC) by default and can be further.
