

# Cable TV transmission optical multimeter anti-electrostatic tracking

## Overview

Featuring advanced anti-interference technology, 100V overvoltage protection, non-contact voltage detection (NCV), and a built-in LED light, this device ensures accurate cable tracing, enhanced operational safety, and adaptability to low-light conditions. Description: This cable tracer set with transmitter and receiver analyses LAN, SAT, TV, telephone and audio cable in off-circuit electrical systems. Cable routing can be traced to a measurement depth of 5 cm with the non-contact receiver. A loud test signal sounds when the selected cable is. The 2715 Cable TV Spectrum Analyzer now includes automated tests for both analog and digitally-modulated channels. RA3209 is an economic and powerful optical power meter, user can calibrate it and remote it through PC. Compared to D201 and D202. Aiming terrestrial antennas and satellite dishes, analyzing DOCSIS and installing optical fibre. It incorporates the measurements for. The AMPCOM Anti-Interference Multifunction Network Cable Tracer is engineered for high-performance network maintenance in demanding environments like data centers, industrial facilities, and enterprise networks.
