

Cable tray right angle price

AI Overview

The cost of installing a cable tray with right-angle fittings typically ranges from \$5 to \$100 per meter depending on material, type, and complexity, with additional costs for right-angle fittings.

Material and Tray Type Costs

Cable tray prices vary significantly based on the material and design:

- Steel trays:** \$5–\$25 per meter; widely used for general-purpose installations due to strength and affordability.
- Aluminum trays:** \$6–\$30 per meter; lightweight and corrosion-resistant, ideal for outdoor or humid environments.
- Fiberglass (FRP) trays:** \$10–\$50 per meter; suitable for aggressive chemical or industrial environments.
- Stainless steel trays:** \$20–\$100 per meter; highly durable and corrosion-resistant, used in heavy-duty or critical applications.

Tray types also affect cost: ladder trays are generally more economical for high-density cable runs, while solid bottom trays provide maximum protection but are more expensive.

Right-Angle Fittings

Right-angle turns require elbows or corner fittings, which are priced separately:

- Standard hot-dip galvanized ladder tray elbows:** typically cost \$20–\$50 per piece, depending on size and material.
- Aluminum or stainless steel elbows:** are more expensive, often \$30–\$100 per piece.

The number of fittings needed depends on the number of turns in the installation.

Installation Costs

Labor and installation complexity add to the total cost:

- Simple straight runs:** \$5–\$15 per meter for labor.
- Right-angle installations:** additional labor may increase costs by 10–30%, due to cutting, alignment, and securing fittings.

Supports, brackets, and fasteners are extra, typically \$2–\$10 per meter depending on spacing and load requirements.

Total Estimated Cost

For a typical right-angle cable tray installation:

- Steel ladder tray with one right-angle turn:** \$10–\$40 per meter including labor and fittings.
- Aluminum tray with multiple right-angle turns:** \$20–\$60 per meter.
- Stainless steel tray in industrial settings:** \$50–\$100 per meter.

Costs can vary based on project scale, location, and supplier discounts. Bulk orders or pre-fabricate...
