

Cable tray vertical bend price

AI Overview

Vertical bend cable trays typically range from \$20 to \$200 per unit, depending on material, size, and configuration.

Price Range and Factors

The cost of vertical bend cable trays varies widely based on several factors:

- Material:** Steel (galvanized or powder-coated) is common for heavy-duty applications and tends to be more expensive than aluminum or fiberglass. PVC or polymer-coated options are generally lower in cost.
- Size and Dimensions:** Width, height, and bend radius significantly affect pricing. For example, a 12-inch wide, 90° vertical bend in pre-galvanized steel may cost around \$50–\$100, while larger 18-inch or 24-inch bends can exceed \$150.
- Type of Bend:** Inside bends, outside bends, and tee or cross configurations have different manufacturing complexities, influencing the price.
- Finish and Coating:** Electroplated zinc, powder coating, or anodized finishes add to durability and cost.
- Supplier and Location:** Prices vary by region and supplier. Bulk orders or industrial suppliers like Alibaba or MVD Fasteners may offer lower per-unit costs, while specialized distributors may charge more for certified or custom fittings.

Additional Considerations

- Customization:** Some suppliers provide custom sizes or configurations, which can increase the price.
- Compliance and Certification:** Products meeting standards like ANSI, BS, or DIN may carry a premium.
- Accessories:** Hardware kits, covers, or junction fittings may be sold separately, adding to the total cost.

For precise pricing, it is recommended to request a quote from suppliers based on the specific material, size, and quantity required. Suppliers like Platt Electric Supply, Alibaba, and MVD Fasteners provide online catalogs and inquiry forms to obtain current pricing.
