

Current Price of Hot-Dip Galvanized Ladder Cable Tray

AI Overview

Hot-dip galvanized ladder cable trays typically range from \$20 to \$150 per meter, depending on size, material thickness, and supplier.

Pricing Overview

Hot-dip galvanized (HDG) ladder cable trays are made from steel coated with zinc through a hot-dip galvanizing process, providing corrosion resistance and long-term durability for industrial and commercial installations. Prices vary based on tray width, rung spacing, steel gauge, and length, as well as customization options such as bends, tees, and risers. Standard lengths are usually 3 meters, with some suppliers offering 6-meter lengths for larger projects.

Typical Price Ranges

- Small widths (150–300 mm): approximately \$20–\$50 per meter
- Medium widths (450–600 mm): approximately \$50–\$100 per meter
- Heavy-duty or custom trays: up to \$150 per meter depending on load capacity and galvanizing thickness

Bulk orders often reduce unit costs by 15–30%, and suppliers may offer OEM or custom designs at competitive rates. Prices can also fluctuate due to raw steel and zinc market conditions, shipping, and import duties if sourcing internationally.

Factors Affecting Cost

- Material thickness and steel grade** – thicker steel and higher-grade materials increase durability but raise costs.
- Galvanizing quality** – minimum zinc coating of 80 μm is recommended for outdoor use.
- Tray dimensions** – wider trays and longer lengths cost more.
- Customization** – bends, risers, and special fittings add to the price.
- Supplier location** – China, Vietnam, and India are major producers offering cost advantages, while local suppliers may include shipping and compliance costs.

Supplier Options

- Jiangsu Holdee Electric Co., Ltd. – offers HDG ladder trays in various sizes with OEM customization and free samples.
- JLH Electric – provides high-quality HDG trays with 3–6 meter lengths and competitive pricing due to in-house galvanizing.
- Parco E...
