

How much does a 24-core fiber optic cable with two power cables cost

AI Overview

A standard 24-core fiber optic cable typically costs between \$1.50 and \$3.50 per meter for single-mode, and \$1.20 to \$3.00 per meter for multimode, with additional costs for integrated power lines or armored construction. Fiber Optic Cable Pricing The price of a 24-core fiber optic cable depends on several factors:

- Fiber Type:** Single-mode (SMF) cables are more expensive than multimode (MMF) due to their long-distance performance and precision manufacturing requirements (typically \$1.50–\$3.50 per meter for SMF, \$1.20–\$3.00 per meter for MMF).
- Cable Construction:** Armored or loose-tube designs for outdoor or direct burial use increase costs, sometimes by 20–50% over standard indoor tight-buffered cables.
- Environmental Rating:** Outdoor-rated jackets (PE, UV-resistant) or flame-retardant LSZH jackets add to the price.
- Adding Power Cables:** Hybrid fiber cables that include two power conductors are typically more expensive than standard fiber-only cables. The additional cost depends on conductor size, insulation, and whether the cable is armored. Based on industry pricing, adding power lines can increase the per-meter cost by \$0.50 to \$1.50 per meter, depending on specifications and protection requirements.

Estimated Total Cost For a 24-core single-mode fiber with two power cables:

- Low-end estimate: \$2.00 per meter (basic indoor cable with small power conductors)
- High-end estimate: \$5.00 per meter (armored, outdoor-rated, high-quality fiber and power conductors)

For a 100-meter run, this translates to approximately \$200–\$500, excluding installation labor and connectors. Prices may vary based on supplier, region, and bulk purchase discounts.

Key Considerations

- Installation Type:** Underground or aerial installation may require armored or reinforced cables, increasing cost.
- Bulk Orders:** Purchasing in bulk (e.g., >1 km) can reduce per-meter...
