

How much does a Huijue G57 fiber optic panel cost

AI Overview

The cost of a Huijue G57 fiber optic panel typically ranges from \$50 to \$300, depending on fiber count, connector type, and configuration.

Price Range and Factors

Fiber optic patch panels like the Huijue G57 vary in price based on several factors:

- Fiber Count:** Panels with higher fiber capacity (e.g., 24, 48, or 96 fibers) cost more than smaller 12-fiber panels.
- Connector Type:** LC, SC, or ST connectors influence pricing, with LC connectors often slightly more expensive due to higher density.
- Pre-Terminated vs. Field Termination:** Pre-terminated panels are more expensive but reduce installation time and labor costs.
- Material and Build Quality:** Panels with metal enclosures or additional features like sliding trays or modular adapters are priced higher.

Typical fiber patch panels in the market range from \$50 for basic 12-fiber indoor panels to \$300 or more for high-density, pre-terminated, or outdoor-rated panels (RLH Industries price list).

Additional Considerations

- Installation Costs:** If professional installation is required, labor can add \$1–\$6 per foot for cabling and \$250–\$1,000 per drop for commercial setups.
- Bulk Purchases:** Ordering multiple panels or complete kits may reduce the per-unit cost.
- Vendor and Region:** Prices vary by supplier and geographic location, so contacting authorized distributors or the manufacturer directly is recommended for an exact quote.

For the most accurate pricing, it is advisable to contact Huijue distributors or authorized resellers with your specific requirements, including fiber count, connector type, and intended installation environment.
