

How much does an indoor electrical distribution box cost in the Dominican Republic

AI Overview

Indoor electrical distribution boxes in the Dominican Republic typically cost between \$10 and \$450, depending on size, material, and features. Price Range For basic indoor plastic distribution or junction boxes, prices generally start around \$10 to \$60 for small residential units, which are lightweight and suitable for standard indoor wiring projects. Metal boxes or larger indoor distribution panels, which offer greater durability and capacity for multiple circuits, can range from \$70 to \$450, depending on amperage, number of circuits, and integrated safety features. If you are considering a full electrical panel replacement or subpanel installation, costs can increase further, with typical installation and labor included ranging from \$400 to \$2,000 for subpanels or main breaker panels, depending on complexity and amperage requirements.

Factors Affecting Cost

- Material:** Plastic is cheaper but less durable; metal boxes are stronger and longer-lasting.
- Size and Capacity:** Larger boxes with more circuits or higher amperage ratings cost more.
- Features:** Advanced features like smart monitoring, digital displays, or energy management increase the price.
- Installation:** Labor costs in the Dominican Republic may vary depending on location, accessibility, and whether the installation is new or a replacement.

Local Suppliers Several companies in the Dominican Republic supply electrical boxes and enclosures, including those based in Santo Domingo and La Romana, offering both standard and customized solutions for residential, commercial, and industrial applications. These suppliers can provide guidance on selecting the right box for your project and may offer installation services.

Recommendation For a typical resid...
