

How much does galvanized cable tray cost in Afghanistan

AI Overview

Galvanized cable trays in Afghanistan typically range from \$15 to \$50 per meter, depending on type, size, and material quality.

Overview Galvanized cable trays are widely used in industrial, commercial, and construction projects in Afghanistan due to their corrosion resistance, durability, and ease of installation. They are manufactured from steel sheets coated with zinc through a hot-dip galvanization process, which protects against rust and harsh environmental conditions. Common types include ladder trays, perforated trays, and solid-bottom trays, each suited for different cable loads and installation environments.

Price Factors

- Tray Type:** Ladder trays are generally more expensive than perforated or solid trays due to their structural strength and suitability for heavy-duty applications.
- Material Quality:** High-grade steel with thicker zinc coating increases durability and cost.
- Dimensions:** Wider and longer trays, or those with higher load capacity, command higher prices.
- Supplier and Location:** Prices may vary between suppliers like Brilltech Engineers Pvt. Ltd. and Gardizi Steel, and delivery costs can affect the final price in different regions of Afghanistan.
- Customization:** Custom sizes or specialized designs for industrial projects can increase costs.

Estimated Price Range

- Standard ladder or perforated galvanized trays: \$15–\$30 per meter
- Heavy-duty or hot-dip galvanized trays for industrial use: \$30–\$50 per meter
- Custom or specialized trays: Prices may exceed \$50 per meter depending on specifications and order volume

Procurement Tips

- Contact suppliers directly for quotes and bulk discounts, as prices fluctuate with steel market rates and shipping costs.
- Verify ISO certifications and quality standards to ensure long-term durability.
- Consider local storage and delivery options to reduce logistical costs within Afghanistan.

For accurate pricing, it is recommended to request a quote...
