

# How much fiber optic cable does Ukraine Broadcasting Corporation have

## Overview

is one of the most modern, diverse and fast-growing sectors in the of. Unlike the country's dominating industries, telecommunications, as well as the related, remain largely unaffected by the, ranking high in and global rankings. The industry also leads in of Ukraine's economy as (once the country's sol.

## AI Overview

The exact length of fiber optic cable owned by the Ukraine Broadcasting Corporation is not publicly disclosed, but Ukraine's broadcasting and telecom networks rely on tens of thousands of kilometers of fiber-optic infrastructure. Ukraine's broadcasting and telecommunications systems are heavily dependent on extensive fiber-optic networks, which have been targeted and damaged during conflicts, particularly in regions like Kyiv, Kharkiv, Kherson, and Zaporizhzhia, where underground fiber cables were cut or destroyed by explosions and occupation forces . These networks support television, radio, and internet services, with multiple redundant routes connecting Ukraine to the European Union via Poland, Romania, Slovakia, and Hungary . By 2026, Ukraine has achieved 78% fiber optic coverage in urban areas, enabling high-speed internet and supporting broadcasting services across most cities . The network includes domestic trunk lines integrated into international systems such as the Trans-Asia-Europe (TAE) and Trans-European Lines (TEL), as well as satellite backhaul and Starlink integration to maintain connectivity during infrastructure disruptions . While the precise length of fiber optic cable for the Ukraine Broadcasting Corporation is not specified, the scale of Ukraine's national fiber network—covering urban centers, regional hubs, and international links—suggests it spans tens of thousands of kilom...
