

How to find fiber optic cable prices

AI Overview

Fiber optic cable prices typically range from \$0.05 to \$6 per foot depending on type, fiber count, and installation requirements. Material Costs Retail prices for fiber optic cable materials generally range from \$1 to \$6 per linear foot, with simple 1-core FTTH drop cables around \$0.13 per foot and high-count backbone cables (e.g., 288 fibers) reaching \$6 per foot. Wholesale bulk purchases can be significantly cheaper, from \$0.09 to \$1.52 per foot. Single-mode fiber is usually less expensive per foot than multimode fiber, but requires more costly equipment for termination and testing. Indoor simplex/duplex cables can cost \$0.05–\$0.30 per meter, while single-mode outdoor cables range \$0.10–\$0.50 per meter. Armored or aerial/self-supporting cables are more expensive, typically \$0.30–\$1.50 per meter, due to additional protective materials. Installation and Project Costs Installation adds significant cost. For example, a 1,000 ft indoor single-mode run with minimal termination may total \$2,650–\$3,100, including cable, labor, permits, and accessories. A 2,000 ft outdoor run with conduit and multiple terminations can cost \$4,940–\$6,120, while a 5,000 ft outdoor armored cable project with splicing and professional testing may reach \$11,000–\$14,500. Costs vary by terrain, labor rates, regional permits, and project complexity. Factors Affecting Price Fiber Count: Higher fiber counts increase cost, but not always linearly; high-count cables often offer a lower price per fiber. Cable Construction: Loose tube, tight-buffered, armored, or non-armored designs affect material and production costs. Jacket Material and Environmental Rating: Outdoor cables with PE or UV-resistant jackets cost more than indoor PVC or LSZH jackets. Connector Type and Pre-Termination: Factory-terminated patch cables and assemblies are more expensive than bulk cable. Brand and Quality: Premium fiber brands like Corning or YOFC cost more but offer lower attenuation and longer lifespan, while generic brands are cheaper but may have higher signal loss over time...
