

Installation cost of aggregation switch

AI Overview

The total installation cost of an aggregation switch typically ranges from \$1,000 to \$20,000 or more, depending on switch type, port density, and professional installation requirements.

Hardware Costs Aggregation switches vary widely in price based on performance and features. Entry-level 8-24 port Layer 2 switches for 10G SFP+ connections can cost \$1,000-\$3,000 per unit, while high-density Layer 3 switches with 25G/100G ports for enterprise or data center use can range from \$10,000 to \$20,000 or more. Popular brands include Cisco, Huawei, HPE Aruba, and Ubiquiti, each offering modular or fixed-port designs that affect cost.

Installation and Setup Costs Installation costs depend on network complexity, rack mounting, cabling, and configuration:

- Rack and mounting hardware:** Some high-density switches require 4-post racks, cantilever shelves, or center-mount brackets, which can add \$200-\$1,000.
- Cabling:** Fiber or copper cabling for uplinks and access switches can range from \$50-\$200 per cable, depending on length and type.
- Configuration and labor:** Professional network engineers may charge \$100-\$200 per hour, with total setup time ranging from a few hours for small deployments to 20+ hours for complex enterprise networks. This can add \$500-\$4,000 to the total cost.

Additional Considerations

- Licensing and software:** Some switches require additional licenses for advanced features like Layer 3 routing, MC-LAG, or QoS, which can add \$500-\$2,000.
- Redundancy and failover:** Deploying multiple aggregation switches for high availability increases both hardware and installation costs.
- Maintenance and support:** Extended warranties or support contracts may cost 10-20% of the switch price annually.

Summary For a small office or campus network, a basic aggregation switch installation may cost \$1,500-\$5,000, including hardware and labor. For large enterprise or data center deployments with high-density Layer 3 switches, total costs can exceed \$20,000, factoring in hardware, cabling, configuration, and support. Th...
