

Is a 1900M router suitable for a 100Mbps fiber optic connection

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. They said we don't need a modem due to being fiber optic and said we need to supply a router. Beyond that they don't really know much more. I would like to get a Nighthawk 1900 Wifi Router but don't know how to tell if it will be. Can i detach my AC 1900 c1000v2 from the cable and attach it to a new fiber optic modem and continue to have it serve as a stand alone router?

I am planning to change my network from a cable to a fiber optic provider.
