

Is there a specific order to fiber optic cable laying

Overview

In order to facilitate maintenance, when laying the cable, the joint well should be 1#, and the order should be analogized. Every hand hole that is a multiple of 5, 10, 15. The Fiber Optic Association, Inc. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. Starting with site surveys and permissions, to installing fiber optic cable and emphasizing the process as a key stage in mastering fiber optic installation, to the careful handling of cables and high-stakes splicing, each stage is critical. Below is given the fiber optic cable installation method statement for performing the installation of optical fiber cabling system for any kind and size of project. This process can be time-consuming, so be prepared for a few work days. The cables are laid using one of two techniques: blowing or pulling.
