

Price of 150 Cable Tray

AI Overview

The price of a 150mm cable tray varies by type and material, ranging from approximately R 217.39 for steel support trays to prices for wire mesh trays depending on length and finish.

Pricing Overview

Steel Cable Tray (RCT 25U, 150mm wide): R 217.39 including VAT. This tray is designed for server racks and data centers, offering robust support, easy installation, and efficient cable management.

Wire Mesh Cable Tray (150x50mm, 3 meters): Prices vary depending on the supplier and finish. For example, hot-dipped galvanized wire mesh trays are available in standard 3-meter lengths, with shipping surcharges applied for deliveries over 2 meters.

Factors Affecting Price

Material: Steel trays tend to be priced differently from wire mesh trays due to durability and load capacity.

Length: Standard lengths are typically 3 meters; longer or custom lengths may incur additional shipping costs.

Finish: Hot-dipped galvanized (HDG) finishes are common for corrosion resistance, which can slightly increase the price.

Supplier and Delivery: Prices may vary between suppliers, and delivery fees can affect the total cost, especially for bulk orders or longer trays.

Recommendations

For server racks or professional installations, the RCT 25U steel tray at R 217.39 is a reliable option. For general cable management in industrial or commercial settings, a 150x50mm wire mesh tray with HDG finish provides durability and flexibility, though the final price will depend on the supplier and shipping. When purchasing, consider the total cost including VAT and delivery, as well as the specific application requirements such as load capacity, environment, and installation type.
