

Price of 600mm Single-Layer Horizontal Cable Management Frame

AI Overview

The price of a 600mm single-layer horizontal cable management frame typically ranges from \$15 to \$50 per unit, depending on material, brand, and features.

Overview A 600mm single-layer horizontal cable management frame is commonly used in server racks, network enclosures, and data centers to organize and route cables efficiently. These frames can be made from metal (steel or aluminum) or plastic, and may include features like finger ducts, D-rings, or brushed panels for cable protection and neatness.

Factors Affecting Price

- Material:** Metal frames (steel or aluminum) are more durable and often priced higher, typically \$25-\$50. Plastic frames are lighter and more cost-effective, usually \$15-\$30.
- Brand and Vendor:** Well-known brands like FS.com or CommScope may charge a premium for quality, warranty, and compatibility with standard racks.
- Design Features:** Frames with finger ducts, D-rings, or brushed finishes may cost more due to added functionality.
- Single-layer frames** are generally cheaper than dual-layer or multi-tier designs.
- Quantity and Bulk Orders:** Purchasing in bulk can reduce the per-unit cost significantly.
- Typical Use Cases:** Organizing Ethernet, fiber optic, or power cables in 19-inch racks. Maintaining airflow and reducing cable strain in data centers. Supporting network scalability and easier maintenance.

Recommendation For the most accurate pricing, it is advisable to check vendor websites like FS.com or CommScope, or request a quote from distributors, as prices can vary based on region, shipping, and current stock.

Summary: Expect to pay \$15-\$50 per 600mm single-layer horizontal cable management frame, with metal and feature-rich models at the higher end of the range.
