

Price of Dutch modular cable trays

AI Overview

Dutch modular cable trays typically range from €50 to €250 per meter, depending on material, type, and load capacity.

Overview Modular cable trays are widely used in commercial, industrial, and data center installations in the Netherlands to support and organize electrical cables safely and efficiently. They are available in various types, including ladder trays, perforated trays, solid-bottom trays, and wire-mesh trays, and are fabricated from steel, stainless steel, or aluminum to meet different load, corrosion resistance, and fire safety requirements. Dutch manufacturers like Stago produce high-quality modular systems with reinforced designs, multiple finishes, and quick-installation features.

Price Factors The cost of modular cable trays depends on several factors:

- Material:** Steel trays are generally less expensive than stainless steel or aluminum, which offer higher corrosion resistance and durability.
- Tray Type:** Ladder and perforated trays are typically mid-range, while solid-bottom or reinforced trays for heavy loads can be more expensive.
- Dimensions and Load Capacity:** Wider trays or those designed for heavy-duty industrial use cost more due to increased material and structural reinforcement.
- Modularity and Accessories:** Systems with modular connectors, dividers, bends, and Unilock coupling systems for fast assembly may increase the overall cost.
- Supplier and Volume:** Bulk orders from Dutch suppliers or distributors can reduce per-meter costs, while specialized or custom finishes may increase prices.

Typical Price Range Based on market trends and supplier offerings in the Netherlands:

- Standard steel ladder or perforated trays: €50–€100 per meter
- Reinforced or heavy-duty modular trays: €120–€200 per meter
- High-end stainless steel or custom-finished trays: €200–€250 per meter

These prices are indicative and may vary depending on supplier, order volume, and project specifications.
