

Resolution cannot be set to 1080p after KVM switcher

Overview

Use quality adapters from the Avico Approved Adapter List. Problem is, the resolution goes down from 1920x1080 to 1024x768 whenever I switch from my work laptop to my desktop. I tried. When I plug the monitor directly to the computer, I can use up to the maximum resolution of 3840 x 2160. I have tried plugging in a Mac through the KVM switch to the same. This guide helps you troubleshoot common issues with KVM switches and provides solutions for getting dual monitor setups working. You'll also learn when it might be time to upgrade to a more reliable, feature-packed KVM switch like Avico's.
