Overview

Huawei routers support optical modules of the following encapsulation types: SFP, eSFP, SFP+, XFP, and QSFP+. SFP: small form-factor pluggable. Optical modules. Huawei Optical Module is manufactured by Huawei Technologies Co. is a telecommunications network solutions provider. Huawei's main business scope is switching, transmission, wireless and data communication telecommunication products. On an optical network, a sender needs to convert electrical signals into optical signals before sending them to a receiver, and the receiver needs to convert received optical signals into electrical signals. Widely deployed by Internet Service Providers (ISPs), telecom operators, FTTH service providers, and enterprise network operators, these optical modules enable.
