

Various models of household electrical distribution boxes

AI Overview

Household electrical distribution boxes come in multiple types, including main distribution boards, sub-distribution boards, modular boxes, and smart DBs, each designed for specific residential applications.

Main Types of Household Distribution Boxes

- Main Distribution Board (MDB)** Central hub for incoming power from the utility. Houses the main switch, circuit breakers, and sometimes meters. Provides overcurrent protection and allows complete disconnection of power for maintenance ().
- Sub-Distribution Board (SDB)** Receives power from the main board and distributes it to specific areas or floors. Often used in larger homes or multi-story buildings to reduce wiring complexity ().
- Modular Distribution Boxes** Designed to accommodate Miniature Circuit Breakers (MCBs), Residual Current Circuit Breakers (RCCBs), and isolators. Modular design allows easy expansion or replacement of components ().
- Surface-Mount and Flush-Mount Boxes**
 - Surface-mount:** Installed on walls, easy to access, suitable for retrofits.
 - Flush-mount:** Embedded into walls for a cleaner look, commonly used in modern homes ().
- Smart Distribution Boxes** Equipped with energy monitoring units, communication modules, and remote control features. Allow real-time monitoring of power usage and remote management of circuits ().
- Weatherproof or Outdoor Boxes** Made from polycarbonate, ASA, or epoxy-coated stainless steel. Protect against moisture, dust, and physical damage for outdoor installations ().
- Specialized Boxes**
 - Surge Protective Device (SPD) integrated boxes:** Protect against lightning or voltage spikes.
 - RCCB + MCB combination boxes:** Provide both overcurrent and earth leakage protection ().

Key Components Across All Household Distribution Boxes

- Main Switch:** Controls overall power supply.
- Circuit Breakers (MCBs):** Protect individual circuits from overloads.
- Residual Current Circuit Breakers (RCCBs):** Detect...
