

What are the different types of Sino-European mesh cable trays

Overview

Four major styles are selected by most installers, and they are Ladder, perforated, solid bottom, and wire mesh. Every style is assigned to a certain job, and the ability to choose the right one will ensure that the building will be safe and will not need to spend money on. Mesh cable trays are ideal for the flexible and safe routing of cables from A to B. Due to the different materials and surface finishes, they can be used in many different areas, both indoors and outdoors. Ladder Type Cable Tray The ladder type cable tray consists of two side rails connected by rungs, allowing excellent airflow around cables. Think of it as a sophisticated “highway” for cables, keeping them organized, protected, and easily accessible. A complete system is made up of.
