GY—room (field) optical cable for communication; GR—soft optical cable for communication; GJ - optical cable in communication room (office); GS - optical cable in communication equipment; GH - submarine optical cable for communication; GT - special optical cable . Let's take a look at the meanings of the fiber optic cable models. A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable but containing one or more optical fibers that are used to carry light. The optical fiber elements are typically. Fiber optic cables are the backbone of modern telecommunications, enabling high-speed data transmission across vast distances. The phone handset graphic denotes this as a telecom cable. There is a lot of information in those few inches along the cable that every installer. The color code used for fiber optics is similar to copper, except for the addition of two colors: Rose (11 th) and Aqua (12 th).
