

# What is the unit price for optical cable processing

## AI Overview

The unit price for fiber optic cable processing typically ranges from \$0.05 to \$1.50 per meter, depending on cable type, fiber count, and environmental specifications.

**Cost Overview**

The unit cost of fiber optic cables varies widely based on several factors, including cable construction, fiber type, and deployment environment. For standard configurations, approximate pricing is as follows:

- Simplex/Duplex Indoor Cable: \$0.05 – \$0.30 per meter
- Single-mode Outdoor Cable: \$0.10 – \$0.50 per meter
- Multimode (OM1/OM2/OM3): \$0.10 – \$0.60 per meter
- Armored Cable (Steel Tape/FRP): \$0.30 – \$1.00 per meter
- Aerial/Self-Supporting Cable: \$0.40 – \$1.50 per meter

Indoor cables with PVC or LSZH jackets are cheaper but unsuitable for wet or UV-exposed environments, while outdoor cables with PE or UV-resistant jackets are designed for long-distance or aerial installation, hence priced higher.

**Factors Affecting Unit Price**

**Cable Type and Fiber Count:** Single-mode fibers are generally used for long-distance networks and have slightly lower raw costs, whereas multimode fibers are common in data centers and short-reach applications, often requiring higher-grade cores.

**Raw Materials:** High-purity silica, plastics (HDPE, LSZH), armoring tapes, and filling compounds contribute significantly to cost, typically \$20–\$50 per kilometer of cable.

**Production Scale and Efficiency:** Larger manufacturing volumes reduce per-unit costs through economies of scale. Efficient production lines can lower costs to \$35–\$80 per kilometer.

**Environmental and Compliance Requirements:** Direct-buried, flame-retardant, or water-blocking cables require additional testing and certification, increasing unit costs.

**Regional and Logistics Costs:** Shipping, customs, and local labor rates can add 5–15% to the total landed cost, especially for overseas shipments.

**Manufacturing Investment**
