

Where are the network cabinet manufacturers for Norwegian data centers located

AI Overview

Network cabinets for Norwegian data centers are supplied by a combination of local distributors and international manufacturers, with key support provided by Networks Centre Norway. Key Suppliers and Locations Networks Centre Norway is a primary supplier supporting data center operators, consultants, and installers across Norway. They provide server and network cabinets, rack accessories, structured cabling, and other IT infrastructure components. While they act as a distributor, they collaborate with leading international manufacturers to deliver cabinets and related equipment to Norwegian data centers. Their operations are based in Norway, serving multiple regions and data center projects.

Industry Associations The Norwegian Data Center Industry (Norsk Datasenter Industri, NDI) represents over 120 companies across the data center value chain, including infrastructure suppliers. While NDI itself is not a manufacturer, it provides a network of contacts and resources for locating cabinet manufacturers and other IT infrastructure providers within Norway. This association can help identify both local and international manufacturers active in the Norwegian market.

International and Nordic Manufacturers Many Norwegian data centers also source cabinets from international manufacturers through local distributors. Companies like Bulk Infrastructure, which operates data centers in Oslo, Kristiansand, and Esbjerg, often collaborate with global suppliers for racks, cabinets, and fiber infrastructure. These partnerships ensure that Norwegian data centers have access to high-quality, standardized equipment suitable for high-density and sustainable operations.

Summary Local distribution: Networks Centre Norway provides cabinets...
