

Where is the mobile optical module inserted

Overview

Insert the module into the SFP cage. If the SFP cage notch is on the bottom, then insert the SFP module with its bail facing up until the module latches into place. An optical module is a typically hot-pluggable optical transceiver used in high-bandwidth data communications applications. NOTE: To install the software to configure the customizable Page Forward and Page Back buttons, refer to the Software. To use an SFP optical module, first confirm that the host port is SFP-type.
