

Zimbabwe CIF Price Tunable Optical Module NRZ

AI Overview

CIF pricing for tunable NRZ optical modules in Zimbabwe depends on the product cost, insurance, and freight, with local suppliers offering various options for import. CIF Pricing Overview The CIF (Cost, Insurance, and Freight) value is the total cost of imported goods including the product price, shipping, and insurance to Zimbabwean ports. Duties and taxes are calculated based on this CIF value, and proof of all charges must be provided to the Zimbabwe Revenue Authority (ZIMRA) for customs clearance. Clearance is typically handled by registered clearing agents using a Bill of Entry in the Asycuda World system. Suppliers in Zimbabwe Several suppliers provide fiber optic modules suitable for NRZ applications: TradeKey Zimbabwe offers SFP optical transceivers with SC connectors, 1310nm FP or 1550nm DFB lasers, and transmission distances up to 80 km. These modules are compatible with Fast Ethernet, SDH/STM-1, SONET/OC-3, and ATM networks. AEDHS.com supplies a wide range of fiber optic products, including high-precision modules, with door-to-door delivery and duty-paid shipping to Zimbabwe. They serve major cities like Harare, Bulawayo, Mutare, and Masvingo. ETU-LINK provides 100G QSFP28 optical modules using NRZ technology, with 4x25G channels converted into a single 100Gb/s optical transmission. These modules are suitable for data center interconnections and enterprise networks. NRZ Tunable Optical Modules NRZ (Non-Return-to-Zero) modulation is widely used in traditional 100G optical modules. These modules typically use four 25Gbps channels multiplexed into a single 100Gb/s signal. Tunable modules allow adjustment of the transmission wavelength, which is useful for flexible network deployment and wavelength-division multiplexing (WDM) systems. Compared to PAM4 modules, NRZ modules are simpler, consume less power, and ar...
